Dental Anatomy and Occlusion

Nearly all dental schools employ waxing as part of initial dental anatomy and occlusion training. While there are often calls to remove this method from the curriculum, pointing to the fact that dentists rarely do their own wax-ups for diagnosis or fabrication of indirect restorations, it is widely applicable to many other follow-on skills.

Dental Anatomy and Occlusion: Maxillary Incisors

NEW Clinical Applications of Dental Anatomy, Physiology and Occlusion chapter includes practical applications and case studies, including instructions on root planing and scaling, extraction techniques and forces, relationship of fillings to pulp form and enamel form, and occlusal adjustment of premature occlusal contacts and arch form in relationship to bite splint designs, all preparing you for the NBDE's new focus on clinical applications.

Wheeler's Dental Anatomy, Physiology and Occlusion 10th ...

Occlusion, in a dental context, means simply the contact between teeth. More technically, it is the relationship between the maxillary (upper) and mandibular (lower) teeth when they approach each other, as occurs during chewing or at rest.. Static occlusion refers to contact between teeth when the jaw is closed and stationary, while dynamic occlusion refers to occlusal contacts made when the ...

All U.S. licensing jurisdictions require evidence that a candidate for licensure has passed Part I and Part II of the written National Board Dental Examination. Each examination is composed exclusively of multiple-choice test items. Part I is a comprehensive examination covering the basic biomedical sciences, dental anatomy and ethics testlets.

State Licensure for US Dentist - American Dental Association

Dental anatomy is a field of anatomy dedicated to the study of human tooth structures. The development, appearance, and classification of teeth fall within its purview. (The function of teeth as they contact one another falls elsewhere, under dental occlusion.) Tooth formation begins before birth, and the teeth's eventual morphology is dictated during this time.
