Check the manual release valve, located on the manifold, usually in the center of the manifold. The manual release valve is the joker, the trickster of the tilt and trim system. All potential problems with the system may result from the manual release valve not being closed, or being partially closed, so make checking this valve the first step you take when going after a problem with the tilt and trim system. The valve is also the easiest of the system's parts to swap out. Before swapping ...
