Routers use static routes and dynamic routing protocols to

# Access Free Routing Protocols And Concepts

learn about remote networks and build their routing tables. Routers use routing tables to determine the best path to send packets. Routers encapsulate the packet and forward it to the interface indicated in routing table.

IPv6 Routing Protocols  
IPv4 and IPv6 Protocol  
Comparison. Routing is  
a process that we route  
packets in a network as  
static or dynamic.

Static routing is done  
manually and dynamic  
routing is done with  
the help of Routing  
Protocols. These  
routing protocols are  
RIP, EIGRP, OSPF, ISIS  
and BGP.
