Lubricants can be used by everyone, regardless of whether their body produces lubrication naturally. If you're dealing with vagina dryness, you may find lubricant especially beneficial.

### Vaginal Lubricants: Types to Try, Tips for Use, and More

They are also used as a base fluid in some wide temperature range greases. PAO lubricants are considered high-performance lubricants because they exhibit certain inherent characteristics including: • wide operational temperature range; • high viscosity index ; • thermal stability; and • compatibility with mineral oils.

### Synthetic Lubricant - an overview | ScienceDirect Topics

Roughly 20 percent of plant applications would be well served with high-performance lubricants. Specialty-performance products are intended for use in extraordinary service. Lubricated components used in a radioactive environment, the vacuum of space, or for compressing oxygen and/or pumping corrosive fluids are appropriate candidates for a specialty lubricant.

### How to Optimize Lubricant Selection for Superior Reliability

More recently, new high performance lubricants were developed to achieve higher green density than conventional lubricant by cold compaction or temperature -controlled die compaction. This paper presents the green and sintered characteristics of these newly developed high performance lubricants in a laboratory and production scale.
