2 Optics is the branch of physics that involves the study of light. People who are interested in optics study how light is produced, how it is transmitted, how it is measured, how it is detected, and how it is used. They study the visible light spectrum, which is the rainbow of light that we can see from red to violet.

Optics - The Study of Light | edHelper.com

Fiber optics pass light through flexible glass or plastic tubes (called fibers). These tubes can be bent allowing light to be directed where it is wanted. Fiber optic scopes can see around corners. Fiber optic cables carry much of the communications of our world (Internet and phone) because it travels at the speed of light. Types of Lights
